

014-08:

PROJECTS FOR TRAINING / COACHING MEMBERS

The coaching project is a new formula introduced this year to allow a better dissemination of projects' results carried out since the establishment of CONSOREM. It is a day-long training session presented in the offices of our members. The programming of this continuing education is based on the specific interests of a company in terms of a particular material or territory. Nine members (eight companies and the Ministry of Energy and Natural Resources) were visited between the months of June 2014 and January 2015, with a total of 74 geologists participating in the meetings. Twenty-six projects were presented, as well as two intensive courses, two mine visits, and four training sessions involved in the use of the LithoModeleur software that processes lithochemical data (**Table 1**).

Project 2014-08: Summary sheet	
Objectives	<ul style="list-style-type: none">➤ Training taking place within member companies.➤ Consolidate, review, and present several projects compiled from previous years for a thematic day event in the companies' offices.➤ Foster discussions and exchanges with a company's geologists.➤ Learn about the use and operation of the LithoModeleur software for the processing of geochemical data.
Results and innovations	<ul style="list-style-type: none">➤ Nine members visited, 74 persons present at the meetings.
Products delivered	<ul style="list-style-type: none">➤ Presentations of previous projects delivered to companies.
