

2015-09

SUPPORT/COACHING/TRAINING

Coordinated by Stéphane Faure

PROJECTS PRESENTED

Project	Title	# Members
Workshop on veins	Intensive training course on veins as applied to the exploration	6
Synthesis alteration	VMS Regrouping of projects; VMS alteration in the major mining camps of the Abitibi	5
2014-01	Chemical and mineralogical characteristics of alterations in the HG metamorphic rocks	1
2014-02	Gold in metasedimentary rocks, Phase 2	8
2014-03	Corridor along the extension of Highway 167: geological synthesis and mineral assessment	3
2014-04	Guides to regional exploration for the Cu porphyry (Au, Mo) and skarns in the Gaspé	1
2014-05	Optimization of analyses from ICP-MS phased array suites for mineral exploration	9
2014-07	Magmatic Ni-Cu-PGE mineralization	2
2013-02	Extension of the Sunday Lake Fault (Mine Detour, Ont.) in Quebec	6
2013-03	Relationship between gold mineralization and metamorphic isograds in Abitibi	6
2013-05	Quality control (QA/QC) of geochemical data in exploration	2
2013-06	Geophysical discrimination of graphitic and sulphuric electromagnetic conductors	1
2011-08	Reassessment of the paleoenvironmental of the volcanic complex of Selbaie	6
2009-04	Synvolcanic structures in VMS environments of northwestern Abitibi	6
2012-02	Reassessment of the geology and exploration models, south of Chibougamau	5
2010-03	The reassessment of the metallogenic corridor of Lebel-sur-Quévillon/Lac Shortt (Abitibi)	5
2008-01	Paleopression, crustal permeability, and hydrothermalism in Abitibi	6
2008-05	Crustal structures and potential magmatic mineralization of Cu-Ni-PGE in Grenville	5
2008-07	Practical guide for using different processing methods for alteration	5
2003-03	Modelling of paleostress and paleopressions along the Porcupine-Destor Fault	6

SUMMARY SHEET

Objectives

- Training in companies.
- Consolidate, review, and submit several projects from the previous years during a theme day at the company offices.
- Foster discussions and exchanges with company geologists.
- Learn about the operation of the LithoModeleur software for processing geochemistry data.

Results

- 8 meetings.
- 10 participating members.
- 62 participants.
